PROJECT REPORT

Y Schools

Troyes, France

ARCHITECT

SCAU associés

MANUFACTURER

ARCELORMITTAL CONSTRUCTION Franc

PRODUCT

Reynolux® Building pre-painted aluminium in 1,97mm thickness

SURFACE

Colour: Custom Chameleon Titanium with Anti-Graffiti technical coating
Coating: DURAGLOSS® 5000

APPLICATION

Cassettes and perforation*

* Please note: For projects including perforation please contact our technical service.

ABOUT

Reynolux® pre-painted aluminium creates subtle moves from light to shadow.

The Troyes Business School – recently renamed Y School – gathers a wide range of educations, including a management school, a design school and a tourism school. When renovating the building, the architects wanted to bring dynamism and life into the school.

Reynolux® pre-painted aluminium was chosen to achieve this contemporary goal: 44 tons in 3003 H44 in 1.97mm thickness were used to clad the building's facade and roof. The custom chameleon titanium colour in DURAGLOSS® 5000, along with the geometrical perforations, creates subtle move from light to shadow according to the different lighting conditions. The school is now a true place to meet and exchange, gathering the actors of the educational sphere: students and teachers.
